Environmental Policy

Our Management team has established, documented and maintain procedures for our Environmental Management System. We also make all employees aware of this system through training and our daily practices; this policy is available to all interested parties of the public.

We conform to the internal company requirements as well as any industry standards and comply with the local, state, and federal environmental laws and regulations.

Our Management team is committed to continually reassessing and revisiting the impact of the environmental aspects of our activities to ensure they have minimal or no effect on the environment.

We at YAPP USA Automotive Systems, Inc. will strive to be good residents in our environment. We will ensure this through Compliance, Continuous Improvement and a committed effort to the Prevention of Pollution.
