SUPPLIER QUALITY AND DEVELOPMENT MANUAL

Revision Log

The information in this Manual is subject to change without notice, revision levels and history is available for identification of latest version.

Rev. Level	Rev. Date	Revised By	Approved By	Sections Revised
1	12/16/2015		Murat Kocak	Initial release
2	2/25/2018		Murat Kocak	YAPP Logo update
3	3/29/2018		Murat Kocak	The Romulus and Chattanooga facilities were added to the introduction. ISO TS 16949:2009 was updated to IATF 16949:2016, and ISO 9001:2008 was updated to ISO 9001:2015. Customer-specific requirements (section 7.6) were updated.
4	9/30/2021		Hector Diaz	Added Supplier Corporate Social Responsibility and Sustainability (section 5.2). Replaced NAFTA (North American Free Trade Agreement) with USMCA (United States-Mexico-Canada Agreement) in section 11.8. Murat Kocak was replaced with Hector Diaz (YAPP USA Director of Quality) as document approver. Added requirement for suppliers to review the Customer (OEM) Specific requirements at initial PPAP submission (sections 7.6 & 8.5).
5	3/6/2023	Manuel Ramos	Rodolfo Gonzalez	(Note added on 7.0 Supply Change Management). Directed Suppliers by OEM's will be evaluated by performing Supplier Assessment audits at beginning of the projects / programs.
6	10/11/2023	Jesus Palacios	Rodolfo Gonzalez	Annual review and validation of agreements with suppliers defined in this manual. Update of Quality director name.
7	04/15/2023	Camila Gomez	Rodolfo Gonzalez	Revision of the manual and update of section 5.0, Business philosophy.
8	1/24/2025	Hayden Cope	Rodolfo Gonzalez	Revision of the manual and addition to the section 6.1, General Requirements
9	05/05/2025	Othon Osorio	Rodolfo Gonzalez	7.4 Low performance supplier escalation process added.
10	01/07/2026	Othon Osorio	Rodolfo Gonzalez	7.4 Road map added in the Low performance supplier process.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

				9.2 Identification of OEM tooling added, and submission of evidence required before PPAP submission. 7.6 CMRTs and EMRTs added 12.13 On a yearly basis added.
11	09/18/2026	Othon Osorio	Rodolfo Gonzalez	8.6 PPAP requirements updated, FMEA and CP requirements added, for PPAP submission and for family documents. 8.9 Non conforming updated, 8D YAPP USA form added. 8.10 Corrective action updated, CP-PFMEA evidence added. 12.9 Warranty requirements updated, Supplier responsibilities updated. 12.10 Traceability requirements updated, adding mandatory barcode for critical components and packaging barcode format (YYYY/MM/DD)

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

1.0 – Introduction

YAPP USA Automotive Systems, Inc. is a world-class, Tier 1 Automotive Supplier specializing in fuel system solutions' design, engineering, and manufacturing. YAPP USA Automotive Systems, Inc. uses injection molded and co-extrusion technologies and industry-leading product development to produce unique multi-layer blow-molded fuel management systems and components, including filler pipes, automotive and non-automotive fuel, and SCR tanks. YAPP USA Automotive Systems, Inc. uses proprietary blow molding processes that enable improved product construction, durability, resistance, and quality.

YAPP USA Automotive Systems provides direct support and services to our customers. YAPP USA Corporate office, Sales and Engineering Center is strategically located in Romulus, MI., enabling direct interaction and improving communication with OEM Manufacturing facilities and Corporate Offices. YAPP USA manufacturing facilities are in Romulus, MI., in Gallatin, TN, 30 miles NE of Nashville, TN., and a satellite location in Chattanooga, TN., allowing us to stay close to our customers and contribute to their success. YAPP USA intends to provide maximum flexibility, efficiency, on-time delivery, and excellent Customer Service to meet and exceed our customers' expectations.

YAPP USA Automotive Systems, Inc. believes in Quality, which is why all our processes are created and integrated to create value for the Customer. YAPP USA employees are committed to continued improvement efforts and initiatives to promote a Quality Culture that results in exceeded expectations and satisfaction for our customers.

To succeed in this endeavor, we need the full and committed cooperation of our Suppliers and their team members. YAPP USA Automotive Systems, Inc. follows important aspects at our manufacturing sites, which include Safety and Environment, Quality, Delivery, Total

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

Cost, and Human Development. We encourage all suppliers to follow these principles to ensure a committed supplier base that supports our requirements.

2.0 – Purpose

The purpose of this manual is to define the expectations and requirements of our current and potential new suppliers of YAPP USA Automotive Systems, Inc., which are the backbone of a long-term, mutually beneficial, and profitable relationship.

Suppliers to YAPP USA Automotive Systems, Inc. are expected to implement and maintain a robust Quality Management System that promotes defect-free products through prevention, monitoring, and continual improvement.

All expectations and requirements are intended to ensure safe and reliable products from Suppliers that meet our customers' expectations for Quality, delivery, and price. We are committed to working with our suppliers to meet this intent and provide continual improvement, emphasizing defect prevention and waste reduction in the supply chain.

YAPP USA Automotive Systems, Inc. will assess each Supplier's ability to comply with the requirements contained in this manual. Based on the perceived risk, the assessment may include an on-site audit by YAPP USA Automotive Systems, Inc.'s SQE or plant personnel.

YAPP USA Automotive Systems, Inc. expects all Suppliers to acknowledge and comply with the requirements contained in this manual. Suppliers are encouraged to visit YAPP USA Automotive Systems, Inc.'s website, www.yappusa.com, and review a controlled copy of this manual for up-to-date guidelines. Further information is also available by contacting the YAPP USA Automotive Systems, Inc. Purchasing Department via e-mail at Purchasing@yappusa.com or the YAPP USA Supplier Quality Group at SupplierQuality@yappusa.com.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

5.0 – YAPP USA Automotive Systems, Inc. Business Philosophy

YAPP USA Automotive Systems, Inc.'s business philosophy and operational principles are based on a win-win ideology and team approach at all levels of our activities.

YAPP USA Automotive Systems Inc. believes in following the “Principles of Lean Manufacturing” and utilizing “5S—Visual Factory” methods. It strives for excellence in adhering to fundamental process basics in Safety, Environmental, Quality, Human Development, Delivery, and Total Cost. YAPP USA Automotive Systems, Inc. values and welcomes every Supplier utilizing similar sound operational practices.

At YAPP USA Automotive Systems, Inc., we are committed to providing the best-in-class products to the global market. To achieve this goal, we strive to reduce the number of incidents and defects to an absolute minimum for our customers. We recognize the significant role our Suppliers play in meeting this goal. YAPP USA Automotive Systems, Inc. appreciates suppliers who can demonstrate their capabilities and meet our expectations.

5.1 - Code of Conduct

In selecting Suppliers, YAPP USA Automotive Systems Inc. works hard to choose reputable business partners committed to ethical standards and business practices compatible with those of YAPP USA Automotive Systems, Inc.

Recognizing differences in cultures and legal requirements, we expect that wherever our products and the components that comprise them are produced, they are made in a manner compatible with the high standards that contribute to the outstanding reputation of YAPP USA Automotive Systems, Inc. Suppliers are required to comply with legal and ethical rules and regulations.

YAPP USA Automotive Systems, Inc. strongly encourages Suppliers to promote best practices and continuous improvement throughout their operations. Suppliers to YAPP USA Automotive Systems, Inc. must comply with all applicable laws and regulations of the countries in which they operate.

Suppliers to YAPP USA Automotive Systems, Inc. are expected to promptly take necessary corrective actions to remedy any identified non-compliance. YAPP USA Automotive Systems, Inc. reserves the right to terminate its business relationship with any YAPP USA Supplier unwilling or unable to comply with applicable laws.

5.2 – Supplier Corporate Social Responsibility and Sustainability

YAPP USA Automotive Systems expects its suppliers and business partners to develop and adhere to rules on human rights, health and safety at work, environmental

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

protection, and combatting corruption. The following sustainability requirements apply to all business relationships with our suppliers.

5.2.1 – Environmental Protection

Suppliers must comply with applicable environmental laws and regulations in all countries where they operate. Suppliers with over 100 employees should have certification according to the international standard ISO 14001. Suppliers shall take on environmental challenges with care and foresight. The development and dissemination of environmentally friendly technologies shall be encouraged. Suppliers are expected to improve the environmental performance of products and services by setting targets and monitoring environmental performance indicators. Impacts on the environment and health of employees must be avoided or kept to a minimum in all activities throughout the entire life cycle of the products and services. Suppliers and business partners shall minimize air emissions that pose a risk to the environment and health, including greenhouse gas emissions. To improve the environmental key performance indicators for products and services, suppliers must provide for proactive management of the most important environmental indicators, including the reduction of greenhouse gas emissions along the entire supply chain. The efficient use of energy, water, and raw materials, the use of renewable resources, and the minimization of environmental and health damage are all considered in development, raw material extraction, manufacture, product service life, and recycling stages, as well as in other activities. Furthermore, suppliers must ensure:

- Compliance with land, forest, and water rights and prevention of forced eviction.
- Reduction of greenhouse gas (GHG) emissions by implementing emission reduction strategies and targets.
- Promotion of energy efficiency in manufacturing processes and facilities.
- Integrate renewable energy sources into operations where feasible.
- Commitment to decarbonization efforts aimed at reducing carbon emissions.
- Maintenance of water quality, efficient consumption, and responsible management practices.
- Preservation of air quality through emission control measures and pollution prevention.
- Responsible chemical management, including the safe handling, use, and disposal of chemicals.
- Sustainable management of resources, including responsibly sourcing raw materials and minimizing resource depletion.
- Implement waste reduction strategies and promote reuse and recycling practices.
- Consideration of animal welfare in relevant operations and supply chain activities.
- Protection of biodiversity, responsible land use, and prevention of deforestation.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

- Preservation of soil quality through erosion prevention and sustainable agricultural practices.
- Mitigation of noise emissions through noise reduction measures and control.

These requirements are integral to our commitment to environmental sustainability and must be upheld by all suppliers and business partners.

5.2.2 - Greenhouse Gas (GHG) Emissions Policy

YAPP USA Automotive Systems recognizes the critical importance of addressing greenhouse gas (GHG) emissions to mitigate climate change and promote environmental sustainability. As part of our commitment to sustainability, we expect our suppliers to actively manage and reduce their GHG emissions across their operations and supply chain. The following requirements apply to all our suppliers:

- **Measurement and Reporting:** Suppliers must accurately measure and report their GHG emissions in accordance with internationally recognized standards
- **Reduction Targets:** Suppliers are encouraged to set science-based emission reduction targets aligned with the Paris Agreement's goal of limiting global warming to well below 2°C above pre-industrial levels. Targets should be measurable and time-bound.
- **Energy Efficiency:** Suppliers must prioritize energy efficiency measures to minimize energy consumption and reduce GHG emissions associated with their operations. This includes adopting energy-efficient technologies, optimizing processes, and improving energy management practices.
- **Renewable Energy:** Suppliers are encouraged to reduce reliance on fossil fuels and decrease carbon emissions.
- **Supply Chain Emissions:** Suppliers must require GHG emissions measurement and reporting throughout their supply chain.
- **Continuous Improvement:** Suppliers are expected to continually monitor, evaluate, and improve their GHG management practices, striving for year-on-year emissions reductions.
- **Transparency and Disclosure:** Suppliers should disclose their GHG emissions data, reduction targets, and progress reports to YAPP USA Automotive Systems upon request, demonstrating their commitment to environmental stewardship and accountability.
- **Collaboration:** Suppliers are encouraged to collaborate with YAPP USA Automotive Systems and other stakeholders to share best practices, innovations, and resources for achieving mutual sustainability goals.

Suppliers adhering to this GHG emissions policy demonstrate their commitment to environmental responsibility and contribute to collective efforts to address climate change and build a more sustainable future.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

5.2.3 – Human rights and labor rights of employees

No slavery and no human trafficking. Suppliers reject all conscious use of forced and compulsory labor as well as all forms of modern slavery and human trafficking. There is no bonded labor or involuntary prison labor. Employment relationships are entered voluntarily and may be terminated by employees at their discretion and with a reasonable notice period.

Child Labor is prohibited. The minimum age for admission to employment in accordance with state regulations must be observed. Follow the guidance of the International Labor Organization (ILO) if no such state regulations exist.

No discrimination and no harassment. Supply partners reject all forms of discrimination and harassment. They must not discriminate against any employees on the grounds of ethnic origin, skin color, gender, religion, nationality, sexual orientation, social background, age, physical or mental limitations, marital status, pregnancy, membership in a trade union or political affiliation as this is based on democratic principles and tolerance towards those of a different opinion, in general, employees are selected, employed, and supported based on their qualifications and capabilities.

In addition to the above, suppliers must ensure:

- Compliance with regulations regarding child labor and young workers, including adherence to minimum age requirements for employment and restrictions on hazardous work.
- Provision of fair and competitive wages and benefits that meet or exceed legal requirements and industry standards.
- Regulation of working hours in accordance with applicable laws and regulations, including limitations on overtime and provision of adequate rest periods.
- Prevention of modern slavery, including slavery, servitude, forced or compulsory labor, and human trafficking, throughout the supply chain.
- Ethical recruiting practices, including transparent and non-discriminatory hiring processes.
- Protection of freedom of association and collective bargaining rights for all employees.
- Promote non-discrimination and prevent harassment in the workplace, including protection against discrimination based on gender, ethnicity, religion, sexual orientation, disability, or other protected characteristics.
- Protection of women's rights, including equal opportunities for employment, advancement, and participation in the workforce.
- Promotion of workplace diversity, equity, and inclusion, including efforts to create a diverse and inclusive work environment.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

- Respect for the rights of minorities and indigenous peoples, including recognition of their cultural heritage and land rights.
- Avoid using private or public security forces that violate human rights or engage in abusive practices.

All suppliers and business partners must strictly adhere to These requirements to uphold human rights and labor standards within our supply chain.

5.2.4 – Occupational Health and Safety

YAPP USA Automotive Systems supply partners must comply with the national occupational health, safety, and fire safety regulations. A process enabling the continuous reduction of work-related health hazards and improving occupational health, safety, and fire safety must be established.

Items that our supply partners should address are:

- Inform employees of identified hazards and the preventative and corrective measures taken to minimize hazards. The information must be available in the languages relevant to employees.
- Conduct training on the prevention of work-related health disorders, the prevention of accidents at work, first aid, chemical management, and fire safety.
- Provide suitable protective equipment and protective clothing free of charge.
- Install appropriate fire protection equipment, such as fire detectors and extinguishing systems.
- Monitor and control work-related health hazards and the resulting protective measures.
- Label the chemicals used as prescribed by the Globally Harmonized System of Classification, Labelling, and Packing Regulations. Chemicals must also be stored in accordance with national regulations.
- Provide appropriate emergency plans, fire protection equipment, and first aid materials for medical assistance in the event of an accident and organize adequate transport for further treatment of casualties.
- Ensure sufficient signage marks an appropriate number of emergency exits, escape routes, and emergency assembly points.
- Suppliers shall provide employees with toilet facilities and drinking water while considering national laws, standards, and regulations.
- All facilities for the consumption and preparation of food, as well as food storage, must be hygienic. If the nature of work requires the provision of dormitories for workers, these must be clean and safe and provide sufficient space. Working and living conditions.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

5.2.5 – Transparent business relations

YAPP USA Automotive Systems and our suppliers bear responsibility for their actions and for selecting their business partners. Therefore, YAPP USA conducts risk-based integrity due diligence regarding our business suppliers. Our business partners act with integrity and protect YAPP USA's reputation. They work towards ensuring that they only maintain business relations with appropriately checked business partners that act in compliance with rules and regulations. They take appropriate actions to remediate identified violations and prevent them in the future.

To avoid conflicts of interest, YAPP USA Automotive Systems' business partners and suppliers make decisions solely based on objective criteria; financial or personal interests or relationships do not influence them.

YAPP USA Automotive Systems and its business partners do not tolerate corruption practices and act against such practices. YAPP USA supports national and international efforts not to influence distorted competition through bribery. We require that our business partners and suppliers reject and prevent all forms of corruption, including what are known as facilitation payments (payments to speed up the performance of routine tasks by officials). Business partners and suppliers must ensure that their employees, sub-contractors, and agents do not grant, offer, or accept bribes, kickbacks, facilitation payments, improper donations, or other improper payments of benefits to or from customers, officials, or other third parties.

In addition to the above, suppliers must adhere to the following requirements:

- Implementing anti-corruption and anti-money laundering policies and procedures to prevent bribery, corruption, and money laundering activities.
- Protection of data protection and data security, including measures to safeguard sensitive information and comply with relevant data protection regulations.
- Maintenance of financial responsibility through accurate record-keeping and transparent financial reporting practices.
- Disclosure of information to YAPP USA Automotive Systems as required, including providing access to relevant records and documentation.
- Commitment to fair competition and compliance with anti-trust laws, including refraining from engaging in anti-competitive practices or agreements.
- Prevention of conflicts of interest by ensuring that business decisions are made impartially and without bias.
- Avoid counterfeit parts by implementing measures to verify the authenticity and integrity of supplied components.
- Protection of intellectual property rights, including respecting patents, trademarks, copyrights, and trade secrets.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

- Compliance with export controls and economic sanctions imposed by relevant authorities, including restrictions on the export of certain goods or technologies to sanctioned countries or entities.

These requirements are essential to fostering transparent and ethical business relationships and must be strictly followed by all suppliers and business partners of YAPP USA Automotive Systems.

5.2.6 – Duty of care to promote responsible raw material supply chains.

Our suppliers must comply with their due diligence obligations regarding relevant raw materials – particularly tin, tantalum, tungsten, gold, cobalt, and mica.

This includes the implementation of measures aimed at identifying risks concerning direct or indirect financing of armed conflicts and severe violations of human rights, including child labor, forced labor, and slavery, and taking appropriate measures to minimize such risks.

This also includes continuous efforts by suppliers to enhance transparency along the upstream supply chain, extending back to raw material extraction. Information regarding smelters or refineries used by suppliers or sub-suppliers must be disclosed to YAPP USA upon request.

We expect suppliers to avoid using raw materials from smelters or refineries that do not meet the requirements of the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk areas. These due diligence requirements are an extension of the above sustainability requirements regarding environmental protection, human rights, employee labor rights, transparent business relations, and fair market behavior, which are integral to the due diligence process.

5.2.7 – Integration of sustainability requirements in organization processes

YAPP USA Automotive Systems expects the values anchored in these sustainability requirements to be integrated into the supplier's day-to-day business through structured and competent management. Management must identify and assess legal and other requirements and train employees to ensure compliance with these requirements.

Policy Statement:

YAPP USA Automotive Systems recommends that business partners and suppliers create an internal policy statement (e.g., a code of conduct) that sets forth their commitments to social, ethical, and ecological standards. This statement shall be written in languages understood at the business partner's location.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

Documentation:

To the extent required by law, Suppliers must keep records of relevant documents and notes to ensure compliance with regulations. This includes maintaining records of necessary permits and licenses.

Training:

Business partners/suppliers shall develop training programs to improve the definition of guidelines, the implementation of processes, and the communication of expectations toward their employees. Suppliers shall continually qualify their employees and encourage them to act according to rules and regulations.

Responsibility:

YAPP USA Automotive Systems recommends that Suppliers appoint a sustainability officer of a similar officer who reports to the management of the respective business partner/supplier. This officer shall develop and implement sustainability targets and measures within the company and ensure compliance with the code of conduct.

Dealing with misconduct:

YAPP USA Automotive Systems expects that employees of business partners/suppliers can speak up in the event of non-compliance with the requirements set out in this document.

Disclosure of Information:

Suppliers must provide accurate and timely information upon request. Open and transparent communication fosters trust and collaboration between YAPP USA Automotive Systems and its suppliers, enabling us to work together effectively towards shared sustainability goals and mutual success.

5.2.8 - Verification of compliance with the requirements by YAPP USA

Automotive Systems, Inc.

YAPP USA Automotive Systems reserves the right to verify compliance with these requirements using appropriate means. This verification may take the form of questionnaires or involve the deployment of experts on-site. An on-site audit of this nature is only carried out following prior notification and in the presence of representatives of the business partner/supplier during their regular working hours and in accordance with applicable laws regarding data protection.

The verification /on-site audits described above may also take place before the business's commissioning. Any identified non-compliance with the sustainability requirements in the supplier's supply chain will be assessed by the supplier within a reasonable period; the supplier is responsible for remedying such non-compliance at no additional cost to YAPP USA Automotive Systems Inc.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

5.2.9 – Reporting misconduct.

To protect YAPP USA Automotive Systems, its employees, and business partners, misconduct must be identified, processed, and remedied immediately. That calls for everyone to be vigilant and willing to draw attention to possible severe regulatory violations based on reasonable suspicion. We also value information of this nature from business partners, suppliers, customers, and other third parties.

YAPP USA Automotive Systems maintains an employee HOTLINE listed in the employee handbook. This line can be used to report severe regulatory and legal violations by company employees. These violations could harm the reputation or financial interests of YAPP USA Automotive Systems.

In the context of a fair and transparent procedure, the Whistleblower System (part of the Employee Hot Line) protects the company, the persons implicated, and the whistleblowers. The system is founded on standardized and swift processes and confidential and professional report processing by internal experts.

If there is reasonable suspicion of potential misconduct by YAPP USA employees or business partners when collaborating with YAPP USA, please report this to the Whistleblower system via the Hotline number.

YAPP USA Automotive Systems considers compliance with the requirements set out in the document to be essential to our business relations. YAPP USA reserves the right to take appropriate legal action if a supplier partner does not comply with these requirements.

The ultimate decision lies with YAPP USA Automotive Systems as to whether it is willing to forego such consequences and instead take alternative action if the business partner can credibly assure and prove to YAPP USA that it has implemented immediate countermeasures to prevent comparable violations in the future.

Additionally, suppliers must protect whistleblowers who report misconduct against retaliation. Any retaliation against individuals who report violations in good faith is strictly prohibited.

YAPP USA Automotive Systems requires the definition and implementation of similar standards for its suppliers. These requirements should be passed along the supply chain.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

6.0 – Quality Management System

6.1 - General Requirements

A robust Quality Management System is an initial base requirement to become a YAPP USA Automotive Systems, Inc. Supplier; it is our expectation that the Supplier adopts continuous improvement practices in their organization; this should be in the form of annual continuous improvement plans documented and approved by upper management. These plans should provide details such as specific goals, action plans, implementation dates and identify personnel responsible. The status of the plans should be reviewed with management at regular frequencies. As required, YAPP USA Automotive Systems, Inc. may ask to review these plans and actions.

In keeping with a continuous improvement philosophy, YAPP USA Automotive Systems, Inc. expects its Suppliers to adopt a visual Business Operating System (BOS), which involves all employees in driving continuous improvement activities throughout the organization. It is expected that this measurement based continuous improvement methodology be utilized to prioritize and focus company resources on the most important aspects of the business such as safety, environmental, Quality, cost, delivery, and human development.

YAPP USA Automotive Systems, Inc. recognizes that adopting Lean Manufacturing Principles is an inherently more cost-effective method of managing a business. Preference will be given to Suppliers who adopt these principles at a plant level and companywide. These programs should include training of all employees to these principles, holding workshops (improvement events), establishing measurables, evaluating and acting on the results, communicating results to all employees and cascading the expectations to tier 3 Suppliers.

YAPP USA Automotive Systems, Inc. prefers Suppliers certified to IATF 16949:2016. Suppliers are expected to implement, maintain, and improve their certification to this technical specification with the objective of achieving zero defects and continually striving to improve product Quality and delivery. YAPP USA Automotive Systems, Inc. is also certified to ISO:14001 Environmental standards. We expect all Suppliers to follow these guidelines as well.

YAPP USA Automotive Systems, Inc. will accept Suppliers registered to ISO 9001:2015 with the ability to meet AIAG (Automotive Industry Action Group) latest edition manuals of Core Tools (APQP, PPAP, PFMEA, MSA and SPC), YAPP USA Automotive Systems, Inc.'s specific requirements and our customers' "Customer Specific Requirements". However if there is only ISO Certification there needs to be an action plan to obtain IATF Certificates. Certificates are to be provided to the YAPP USA Automotive Systems, Inc. Supplier Quality Group and updated as required. Calibration and Testing Service Suppliers must be certified to ISO/IEC 17025 by an accredited third-party certification body or approved in writing by the OEM.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

In the event of changes to the Quality management system certification status, the Supplier must notify the YAPP USA Supplier Quality Group within five business days.

Communication:

All communication with YAPP USA Automotive Systems Inc. must be done in English.

6.2 - End Customer Expectations

In the Automotive Industry today, it is necessary for all Suppliers to be familiar with the end Customer's Quality requirements as it is a requirement of YAPP USA Automotive Systems, Inc. to cascade these requirements down to our supply base. An example of such a requirement is General Motor's QSB (Quality System Basics) audit where Suppliers and sub-Suppliers of product to GM are expected to conduct this self-audit.

YAPP USA Automotive Systems, Inc. expects its Suppliers to be familiar with and implement our end Customers' requirements as defined in their "Customer Specific Requirement" publications. This includes but is not limited to annual layout and/or functional testing, adherence to CQI-9 Special Process: Heat Treat System Assessment, CQI-11 Special Process: Plating System Assessment, CQI-12 Special Process: Coating System Assessment, CQI-14 Consumer-Centric Warranty Management and GM 9999-1:H13 Steel and Heat Treat Certification.

7.0 – Supply Chain Management

7.1 – Supplier Selection

Potential Suppliers go through a selection process and upon approval are listed in the Approved Supplier's List. Sourcing is done from those listed in the Approved Supplier's List and remaining in good standing. An evaluation process is conducted to ensure all Suppliers continue to meet YAPP USA Automotive Systems, Inc.'s expectations for Quality, delivery, responsiveness, and ability to stay current with technology and cost.

It is YAPP USA Automotive Systems, Inc.'s expectation that Suppliers implement a visual business operating system (BOS) that involves all employees in driving continuous improvement activities through the organization. It is expected that this measurement based continuous improvement methodology be utilized to prioritize and focus company resources on the most important aspects of the business such as safety, environmental, Quality, cost, delivery, and human development.

YAPP USA Automotive Systems, Inc. recognizes that adopting Lean Manufacturing Principles is an inherently more cost-effective method of managing a business. Preference will be given to Suppliers who adopt these principles at a plant level and companywide. These programs should include training of all employees to these principles, holding workshops (improvement events), establishing measurable,

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

communicating results to all employees, and cascading the expectations to tier 3 Suppliers.

All present and potential Suppliers to YAPP USA Automotive Systems, Inc. shall be able to demonstrate, with evidence that they have implemented and maintain a Quality Management System that conforms to the requirements detailed in IATF 16949:2016 or ISO 9001:2015. Third party registration to IATF 16949:2016 or ISO 9001:2015 is required by YAPP USA Automotive Systems, Inc. for automotive Suppliers.

The environment is a priority to YAPP USA Automotive Systems, Inc. and therefore Suppliers are encouraged to be certified to ISO 14001 or working towards certification. Further, the Supplier shall be able to demonstrate, upon request, compliance with local, national, and international standards and regulations regarding health, safety and environmental issues relevant to the Supplier's business.

A Supplier Assessment by YAPP USA Automotive Systems, Inc. Supplier Quality Group may be required prior to the approval of a purchasing agreement. The YAPP USA Supplier Assessment Survey is structured to evaluate the Supplier's QMS conformance to IATF 16949:2016, ISO 9001:2015, AIAG requirements and Customer Specific Requirements. Additional requirements might be necessary, which will be communicated to the Supplier prior to the survey.

Note: Non-Directed / Directed Suppliers by OEM's will be evaluated performing Supplier Assessment audits at beginning of the projects / programs by Engineering, Purchasing and Quality (SQE).

Non- automotive Suppliers may be required to conduct a self-audit as an interim approval at the discretion of YAPP USA Supplier Quality Group.

A copy of the YAPP USA Supplier Assessment Form can be obtained from the YAPP USA Supplier Quality team at SupplierQuality@yappusa.com.

The YAPP USA Buyer will notify the nominated Supplier of a new business award by issuing a Purchase Order for the program. In special circumstances, a letter of intent may be issued and can only be issued by YAPP USA Automotive Systems, Inc. Purchasing Department. The Supplier will submit PPAP based on Purchase Order acceptance, other discretionary requirements will be clearly identified as a condition of the Purchase Order.

Supplier Development of Specialty Designated Small Suppliers

When a direct Sub-Supplier to YAPP USA Automotive Systems, Inc. is so small as to not have adequate resources to develop a system according to the current version of IATF 16949:2016 or ISO 9001:2015, or supplies non-engineered products, certain specified elements may be waived by YAPP USA Automotive Systems, Inc. to the Supplier. "Small" here above refers to the size of the organization and may also refer to the volume supplied to the automotive industry. YAPP USA Automotive Systems, Inc. will still assess

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

the Sub-Supplier's size, dollar value of the business, type of product supplied, Quality, manufacturing and delivery systems capability and the risk to YAPP USA Automotive Systems, Inc. Sub-Suppliers are still held accountable to meet the needs of the operations and will be monitored through current Supplier Quality Group's procedures. These sub-Suppliers may also be referred to as "Special Condition" Suppliers.

In addition, the YAPP USA Automotive Systems, Inc. direct Supplier certified to current versions of IATF 16949:2016 or ISO 9001:2015 shall have assessment criteria applied consistently to determine the specially designated small Sub-Suppliers for which this provision may also apply. Suppliers may use the YAPP USA Automotive Systems, Inc. Supplier Risk Assessment as a tool to assess the risk.

At a minimum, the direct Supplier should assess the Sub-Supplier's size, dollar value of the business, type of product supplied, Quality system, manufacturing and delivery systems capability and the risk to YAPP USA Automotive Systems, Inc. Suppliers are responsible for ensuring that Sub-Suppliers develop a Quality management system that facilitates defect prevention, monitoring, and improvement. The Supplier is responsible for managing production risk through sourcing to financially stable Sub-Suppliers and monitoring Sub-Supplier financial stability (IATF 16949:2016 clause 8.4.1.2).

7.2 - Approval

To be awarded business from YAPP USA Automotive Systems, Inc., a potential new Supplier is required to enter a competitive bidding process with a lowest total cost approach. When it becomes evident that business will be awarded to the potential new Supplier, a more in-depth analysis is done of the potential Supplier's ability to meet YAPP USA's requirements for Quality, delivery, responsiveness, technology and cost. An on-site audit may be conducted to confirm the potential Supplier's capability and capacity to meet the requirements.

Potential Suppliers will be requested to complete a Supplier Information form and a Supplier's Profile form. Once completed, the forms are to be submitted along with copies of the Quality system certification to the YAPP USA Buyer at Purchasing@yappusa.com.

A copy of YAPP USA's Supplier Profile Form can be obtained from the YAPP USA Purchasing team at Purchasing@yappusa.com.

This form requires to be updated whenever any of its content changes, such as changes of key personnel. In addition, the potential Supplier shall provide in writing a separate list with the names, responsibilities, address, phone numbers and email for those occupying the position of President/Senior Executive, Top Sales Executive, Account Manager, Quality Manager, and a primary Program Manager.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

At the discretion of the Buyer, a pre-award/technical review meeting for new or current Suppliers offering new products or services may be conducted prior to the commencement of supply, based on risk assessment or potential issues, if identified. Technical, Quality, manufacturing, engineering, purchasing, delivery, capacity, and business issues shall be reviewed during this meeting to provide:

- A. The Supplier, with a thorough understanding of YAPP USA Automotive Systems, Inc.'s requirements and expectations.
- B. YAPP USA Automotive Systems, Inc., with a thorough understanding of the Supplier's capabilities, program risks and limitations.

7.3 - Supplier Development Program

YAPP USA Automotive Systems, Inc. will prioritize Supplier development based on the performance results, associated risks and criticality of the product and components.

The Supplier development plan can consist of the request for corrective action, scheduled progress report meetings, audits by the YAPP USA Automotive Systems, Inc. SQE, and on-site support of Quality systems.

Supplier development plans may include support in Quality systems, Lean Mfg., six-sigma, team-oriented problem solving, etc.

YAPP USA Automotive Systems, Inc. has high expectations of all Suppliers and will seek to work with Suppliers that demonstrate a strong commitment to Quality improvement, continuous improvement, and cost savings.

7.4 - Supplier's Performance Evaluation

YAPP USA Automotive Systems Inc. evaluates its Supplier's performance monthly through means of a scorecard issued within 10 days of each month's end and delivered electronically to the Supplier's contact on record. The scorecard report provides a final score based on an evaluation of the Supplier's performance on each of the following areas, which have been identified as a key success factor for YAPP USA Automotive Systems, Inc.:

- Line interruptions (at YAPP USA and Customer locations)
- On time delivery (Material and Documentation)
- Customer Satisfaction
- Logistic issues (Labeling, packaging, ASN notifications, etc.)
- PPAP issues

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

When there are concerns in the above categories, penalty points are applied based on the number of rejected parts or occurrences giving demerit points, the total of which is used to calculate the performance score in a percentage form.

Suppliers are rated under this system in the following color format.

GREEN	90 – 100%	RED	Less than 90%
--------------	-----------	------------	---------------

No action will be required from Supplier when monthly performance is 90% or above. This is indicative of a Supplier's acceptable performance, and it is YAPP USA Automotive Systems Inc.'s expectation that Supplier achieves this category each month.

When a non-acceptable performance score of less than 90% is obtained for 3 consecutive months or a major disruption at Yapp USA or OEMs occurs, YAPP USA Automotive Systems Inc. will initiate the Low Performance Supplier Escalation process.

Supplier is required to follow the Low Performance Supplier Escalation process signing the Low Performance Supplier Escalation form, attending the monthly Road Map meeting and presenting the Road Map form updated following all the requirements. YAPP USA Automotive Systems, Inc. reserves the right to request the Supplier to visit the YAPP USA facility to present a corrective action to the YAPP USA personnel involved, if necessary.

In case the Road Map requirements are not followed, or the supplier performance continues with a negative trend, the Escalation level will increase.

Suppliers that fail to close an SQIN within the 30-calendar day period after SQIN issuance will receive a Customer Satisfaction penalization. This might affect the Supplier's performance for the consecutive month.

7.5 - Delivery Expectations

YAPP USA Automotive Systems, Inc. issues release dates through the "YAPP USA Planning Schedule". It is important to note that these are in-house arrival dates. It is expected that the Suppliers use appropriate lead times to ensure product arrives to schedule.

On time delivery is a key part of meeting our customers' expectations, the product we receive from our supply base also needs to meet these expectations. A supplier's delivery performance is calculated through tracking non-compliance with shipping dates, quantities, expedited freight and ASN's.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

7.6 - Customer Specific Requirements

Specific OEM's Customer Specific Requirements are an integral part of doing business in the automotive industry and are a part of the contract with YAPP USA Automotive Systems, Inc. It is expected that all suppliers become knowledgeable in and practice all applicable OEM's customer specific requirements.

Customer (OEM) Specific requirements are available at: <https://www.iatfglobaloversight.org/oem-requirements/customer-specific-requirements/>. Please contact SupplierQuality@yappusa.com to obtain a copy of the Customer Specific Requirements for the following Customers: John Deere, Nissan, Volvo.

Examples are:

Certificate of Origin
Packaging Forms
Shipping Label
Warranty Management
IMDS
Process Review
Run at Rate
PPAP Samples
CMRTs
EMRTs

8.0 – Product/Process Development Requirements

8.1 - General

YAPP USA Automotive Systems, Inc. requires all Suppliers of production, service, and prototype parts to follow the guidelines provided in the AIAG Core Tools manuals.

At the launch of any new programs or the changeover of existing parts, the Supplier's product and process, development practices are expected to follow the elements as defined in the AIAG APQP (Advanced Product Quality Planning) manual. On any changeover of existing parts, Suppliers are required to do a detailed review of existing parts to fully understand the Quality appearance and functionality of the part(s).

When Customer directed Suppliers are required to be used, the same level of controls is practiced as would be expected of the regular supply base.

The Supplier shall plan and develop Quality systems and manufacturing processes required for product acceptance (PPAP) based on their quote and YAPP USA Automotive Systems, Inc. program timing. Each Supplier shall develop a Quality plan that promotes continuous improvement in all activities such as Quality, cost and delivery and where appropriate, design and development. Documentation providing evidence of adherence to this plan shall be made available to the YAPP USA Buyer/SQE upon request.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

8.2 - Program Development

At the time of any new job award or the changeover of existing parts a pre-award review will be held with the Supplier's multi-disciplinary APQP team prior to the release of a Purchase Order for materials, products or services related to production, the intent of the meeting will be to ensure the Supplier has a thorough understanding of the requirements and expectations of the job in addition to YAPP USA Automotive Systems, Inc. understanding the Supplier's capabilities, program risks and limitations.

Prototype parts

The goal is to manufacture prototype parts using a production-based process in order to learn and develop robust part(s) for full production. At a minimum, the Supplier must use process planning (flow charts, control plans, inspection plans and work instructions) to define and implement the prototype build. All special and critical characteristics must be documented on all process control documents.

Prototype parts must meet all drawing requirements prior to shipment. Supplier must have a dimensional plan to layout or CMM parts to show conformance to drawing requirements for each serial numbered part, as required. Quantity of parts inspected will be documented in the specific build plan.

Engineering prototype parts with documentation of specification conformance shall be submitted for engineering validation testing. Documentation shall meet YAPP USA Automotive Systems, Inc., AIAG and Customer Specific requirements.

In all cases, the Suppliers are expected to follow the requirements defined in the end Customer's "Customer Specific Requirements" publications.

A robust APQP process with strong communication within the Supplier's organization and with YAPP USA Automotive Systems Inc. personnel is necessary to ensure all timelines, specifications and costs are met. Suppliers may be required to attend and support APQP meetings at YAPP USA Automotive Systems, Inc. or at the end Customer's facilities.

Documentation as evidence of adherence to the plan and progress of the program shall be made available to YAPP USA Automotive Systems Inc. personnel upon request.

Suppliers are responsible for sub-supplier's program activities and to ensure that the relevant documentation is available to support all APQP activities and the PPAP approval process.

Suppliers must have an effective continuous improvement process that reduces the Risk Priority Number (RPN) by operation. An RPN reduction system must be clearly defined with specified values over which action items will be taken.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

All production part sample submission shall include all requirements listed in the PPAP manual. Any deviations from these requirements shall only be authorized by the YAPP USA Supplier Quality Group. The need for an Appearance Approval Report (CFG-1002) and other discretionary requirements will be clearly identified as a condition on the Purchase Order.

All PPAP submissions are to be in electronic media.

8.3 – Supplier Annual Agreement

All suppliers shall review and sign the Supplier annual agreement and share with the Supplier Quality YAPP USA Automotive Systems, Inc.'s. team within 1 week after receiving it. In case the supplier is not capable to meet the YAPP USA Automotive Systems, Inc.'s. requirements the supplier is required to set up a revision meeting with Purchasing and supplier quality to evaluate the action plan to meet the requirements.

8.4 - Special Characteristics

Product is designated with special characteristics because variation is likely to significantly affect Customer Satisfaction with product fit, form or function. These designations are defined by YAPP USA Automotive Systems, Inc. or our Customer and listed on the design record. These characteristics shall be identified on all PFMEA's and Control Plans that are developed in accordance with AIAG's, PFMEA and APQP manuals. Special characteristics can include product characteristics and process parameters.

Definition of YAPP USA Automotive Systems, Inc.'s. Special Characteristics:

“{SC}” = Product characteristic or process parameter with reasonably anticipated variation which affects a product's safety or compliance with regulatory requirements as judged by the YAPP USA Automotive Systems, Inc. internal cross functional APQP team assigned to the project.

“[KC]” = Product characteristic or process parameter with reasonably anticipated variation which affects a product's fit / function or has need for high visibility as judged by the YAPP USA Automotive Systems, Inc. internal cross functional APQP team assigned to the project.

All {SC} and [KC]'s listed on the design record shall be statistically monitored to prove capability. Process capability must be documented and evaluated. At minimum, the Supplier's shall be familiar with and apply SPC as per the AIAG's SPC manual.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

The minimum requirement for short-term capability is Ppk 1.67 and long-term is Cpk 1.33. Items not meeting the above capability criteria shall be 100% inspected until capability is resolved. Test data is to be submitted to the respective YAPP USA Automotive Systems Inc. plant as required.

Control of Significant and Critical Characteristics

In general, those Suppliers who produce a component, a subsystem or a complete system are responsible for the delivered Quality of the product and for creating and retaining the required documentation. Suppliers are obliged to follow Customer Specific Requirements Procedures where identified by YAPP USA's Customers. In absence the default system should be identified by IATF 16949:2016, AIAG QS900 SPC MANUAL or VDA.

Suppliers to YAPP USA are expected to establish the appropriate Process Controls for all Significant / Critical characteristic(s) identified during the APQP process and document these controls in the Control Plan.

In all cases whether YAPP USA Automotive Systems, Inc. or the Supplier is the design authority, Significant and Critical Characteristics will be identified on the part drawing, in test specifications and other applicable design records.

In all cases, the Supplier's Design Records will identify these characteristics. If the Design Records are proprietary (protected information), then the Supplier's Control Plan shall identify these Characteristics, Control Method, Gages used and Frequency of Sampling.

8.5 - Error Proofing

During the APQP process, the Supplier shall implement all necessary error proofing into the manufacturing process to eliminate or reduce the manufacture of defective product. The error proofing methods and devices shall be recorded in the PFMEA and Control Plans.

Error proofing devices shall be verified with the use of "rabbits" at least once a shift and records kept to ensure the device is continuing to function effectively.

8.6 - PPAP

All PPAP's are submitted in accordance with AIAG's PPAP (4th edition) manual and the individual Customers' Specific Requirements. Suppliers must review the YAPP USA PPAP checklist to make sure all requirements are met. Customer (OEM) Specific requirements are available at: <https://www.iatfglobaloversight.org/oem-requirements/customer-specific-requirements/>. Please contact SupplierQuality@yappusa.com to obtain a copy of the Customer Specific Requirements for the following Customers: John Deere, Nissan.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

For initial PPAP submission, Supplier shall submit Level 3 PPAP documentation at a minimum, all the documents shall be submitted electronically, including PFMEA and Control Plan documents for each PN. The supplier is allowed to use family FMEAS and CP for families of parts where the only difference is dimensional or color, not form, application or function, unless otherwise agreed upon in writing by the YAPP USA Supplier Quality Group. Data must be submitted to IMDS database by the Supplier prior to PPAP. All PPAP's are to be submitted electronically. Once PPAP approval has been granted, Suppliers are required to identify the first 3 shipments to YAPP USA with the GREEN IPP label (this labeling requirement applies for new part numbers, approved Engineering Changes or newly PPAP'ed parts).

Suppliers are expected to maintain a record of all PPAP documentation submitted including approved PPAP part. PPAP and Quality records are to be kept by Supplier for product life plus one year; the minimum run size for a PPAP is 300 pieces unless otherwise agreed in writing by the YAPP USA Automotive Systems Inc. Supplier Quality Group. Three sample parts are required for each PPAP submission. These parts shall be identified with the YAPP USA PPAP yellow label, properly packaged /protected, and sent to the YAPP USA Automotive Systems Inc. Supplier Quality Group.

Review the YAPP USA PPAP Checklist for submission details and requirements. Checklist can be obtained via SupplierQuality@yappusa.com

PPAP annual validation is a customer specific requirement and an important aspect to ensure the parts meet all Quality, functional and appearance characteristics. All initial PPAP packages submitted to YAPP USA at any time during the current calendar year will automatically expire on the same date during the following calendar year. PPAP annual validations must be submitted to the YAPP USA Supplier Quality Group at SupplierQuality@yappusa.com. Suppliers are responsible for creating and maintain a schedule to make sure PPAP submissions to YAPP USA do not expire. In case the Supplier fails to submit annual validation within the required dates, YAPP USA will issue a SQIN to record this failure and a corrective action requested.

8.7 - Containment Requirements (GP12/Safe Launch)

YAPP USA Automotive Systems, Inc. requires all Suppliers of production parts to utilize the SECA (Supplier Early Containment Activity) program for all pre-production, ramp-up, system fill and for any product manufactures after a shutdown of 5 or more consecutive days. Containment will be kept in place until YAPP USA or the Customer exit criteria is met. This means that the Supplier's process is capable of sustaining production meeting all contractual requirements. Acceptable containment processes are those that meet the same intent as General Motors GP12. YAPP USA Supplier Quality may require the continuation and/or modification of Safe Launch containment activities if defects escape the Supplier while Safe Launch is in operation.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

Data collected from the containment process needs to be made available to YAPP USA Automotive Systems, Inc. personnel as required.

Suppliers shipping parts under the Safe Launch Plan shall attach to each shipping label a green circular sticker showing “SECA” and signed by a staff person accountable for the Quality level of the facility. The green circular sticker should have a diameter of approximately 50 mm.

Note: Exit criteria for the Safe Launch Plan is shipment of zero defect parts that meet either the defined period of time or number of pieces. Any defect discovered during the SECA period restarts the event to “0” pieces shipped.

Suppliers must obtain the “Supplier Early Containment Activity” (SECA) document via SupplierQuality@yappusa.com in order to review additional details and requirements

8.8 - Process and/or Product Changes

Unapproved changes are not acceptable; they put our processes at risk and those of our Customers. Any requested changes shall be initiated with a formal change request to YAPP USA Automotive Systems, Inc. followed by a PPAP submission that meets the conditions required for re-submission as detailed in AIAG’s PPAP manual and applicable Customer Specific Requirements.

Any request for changes will be addressed to the respective YAPP USA Automotive Systems, Inc. Engineering Representative. Approvals to a request for change must be obtained before implementing the change. A deviation may be obtained from the YAPP USA Engineering Group in the form of a signed Design or Process Concession.

YAPP USA Automotive Systems, Inc. expects its Suppliers to verify and document the product dimensional before and after each approved Engineering Change. They are to communicate any issues or concerns with the design, material, performance, appearance, durability or any other key characteristic based on their expertise, knowledge and lessons learned from similar products.

Required written approvals and PPAP resubmissions are required for:

- Changes to previously approved materials or sub-Supplier’s material changes
- Changes or modification of product specifications.
- Changes to process or method of manufacture
- Changes to the inspection process, methods or equipment.
- Change of Sub-Suppliers.
- Changes to any inputs supplied by your tiers.
- New start-up after a 12-month decommissioning period.
- Transfer of manufacturing location.
- Rework processes whether in process or off line.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

When there is a new part number assigned, approved Engineering Change or initial PPAP submission to the Supplier part, Suppliers must attach the YAPP USA IPP GREEN label on 2 sides of every container/box; label is to be printed on an 8 ½ x 11 sheet of green paper. This must be done for the first 3 shipments delivered to YAPP USA Automotive Systems Inc.

The Supplier shall be held liable for any cost incurred by the changes made without obtaining a written supplemental Purchase Order or an approved Design or Process Concession. The Suppliers will not be paid for product, tooling, processing equipment, etc. until the change is approved.

The Supplier must notify YAPP USA Purchasing if there is a change in program timing and risk to meeting agreed upon tooling completion or PPAP date. Supplier will be required to add additional resources and/or work additional hours (7 days, 24 hours) to ensure date is met.

The Supplier must allow YAPP USA Automotive Systems, Inc. to review product and process development and planning via on-site review and confirmation during development or at any time during part production, if requested.

For changes initiated by YAPP USA Automotive Systems, Inc. or our Customers, the YAPP USA Procurement department will be the point of contact for formal notification to Suppliers of all drawing/design changes via a purchase order amendment.

It is the Supplier's responsibility to ensure all Production processes are launched in such a manner that they will not adversely impact YAPP USA Automotive Systems, Inc. or its Customer's production processes to meet timing and quantity. The use of Safe Launch tools such as pre-production product flow diagrams and control plan are a minimum requirement.

Documentation must reflect the specific information (i.e. part/drawing numbers, part/drawing revisions, Supplier code, etc.). A copy of the part drawing or design record (matching the latest revision requested) must be submitted or available for review. This drawing must be ballooned, that is, all dimensions, specifications, notes, etc. must be labeled or numbered in an orderly fashion and correspond to the Dimensional/Material/Performance results. When the design records are in electronic format, the Supplier shall submit this information in place of the normal "paper" drawing. This includes all notes and specification pages.

Supplier must verify compliance to ALL drawing requirements. This includes ALL dimensions, tolerances, notes, material/performance specifications, etc. The correct way to do this is to number (or label) ALL print requirements and then correlate the numbers to the actual data (dimensional or material/performance data) that proves compliance. This must be completed for each unique cavity, tool, machine, production line/process, mold, etc. For new parts or tooling, the Supplier shall perform a full dimensional layout

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

on at least one (1) part from each cavity if multiple cavity tooling exists. For changed parts or tooling, the Supplier shall perform a dimensional layout on at least one (1) part and/or parts from all cavities of all dimensions affected by changes.

Any authorized engineering changes that have not been recorded in the design record but incorporated in the product, part or tooling must be included. If specified by YAPP USA Automotive Systems, Inc. the Supplier shall have evidence of engineering approval.

8.9 - Non-Conforming Product

When non-conforming product is found at YAPP USA Automotive Systems, Inc. a Supplier Quality Issue notice (SQIN) will be issued to the Supplier (Refer also to Section 7.4.)

YAPP USA Automotive Systems, Inc. requires the Supplier to notify as soon as non-conforming product is found and if potential similar conditions may exist with product in transit or already at the YAPP USA manufacturing plant location.

When YAPP USA Automotive Systems, Inc. finds supplied product to be non-conforming, the product will be tagged, segregated and the Supplier will be notified for immediate action to be taken by replacing product with certified material, and/or providing on site sort requirements.

In the event that non-conforming material is received by YAPP USA Automotive Systems, Inc. the Supplier is required to take immediate containment action in less than 24 hours to isolate YAPP USA Automotive Systems, Inc. from further delivery of defective material. The Supplier must provide a corrective action plan within 2 weeks and complete corrective action within 30 calendar days of SQIN issuance **using the YAPP USA 8D form.** When required, the specific OEM format will be used to document the permanent corrective action.

Costs incurred by YAPP USA Automotive Systems, Inc. due to poor product Quality, non-conforming product and delivery not meeting contractual requirements may be charged back to Supplier.

YAPP USA Automotive Systems, Inc. expects all Suppliers to deliver material ready for use without the need for incoming inspection. Suppliers are also required to perform annual validation and layouts to ensure product meets all Quality, functional and appearance guidelines.

The Supplier is required to account for and document the disposition of all non-conforming material. YAPP USA Automotive Systems, Inc., at its sole discretion, may request formal confirmation/photos of the disposal and/or scrapping of non-conforming or obsolete material.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

8.10 - Corrective Action

When corrective actions are required, they will be addressed in the following manner:

- Initial response within 24 hours of receiving SQIN using Supplier's corrective action 8D format addressing containment action.
- Full root cause analysis and systemic corrective actions to be submitted within **30 days**.
- PFMEA's and Control Plans must be updated to reflect the corrective actions taken, **evidence of these changes shall be included in the 8D.**

The YAPP USA SQE may follow up with a visit to verify corrective action implementation. All corrective action submissions are to be in electronic media.

8.11 - Quality Rejection Costs

The following charges may be applied by YAPP USA Automotive Systems, Inc. at the time of the occurrence of each Quality rejection.

Administration Charge	Minimum \$500 and/or as per OEM charge to YAPP USA.
Part Cost	Actual Cost
YAPP USA Line Shut Down	Actual Cost
Customer Line Shut Down	Actual Cost
Lift Truck Usage	Actual Cost
Charges From Our Customer	Actual Cost
Excess Transportation	Actual Cost
Travel and Accommodation Expenses	Actual Cost
Labor Costs	Actual Cost*\$60.00 per hr. (Increased charges apply for weekend labor)
Additional charges may apply	Engineering support, material handling, sorting, rework, scrap, etc.
	* All above in US dollars

8.12 - Deviation Request

In the event that a Supplier wishes to submit a request for deviation, the following conditions must be met:

1. Request should be submitted to the YAPP USA Automotive Systems, Inc. Supplier Quality Group in writing using the "Engineering Change / Deviation Request Form". Request is to be submitted with supporting documentation such as statistical, process capability data, testing results and/or drawings.
2. Suppliers may **not** ship product without deviation approval.
3. Suppliers must clearly identify all shipments under an approved deviation with the GREEN IPP label (to be printed on an 8 ½ X 11 sheet of paper) and placed on 2 sides of every container/box. The form needs to be completely filled out, clearly

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

stating YAPP USA assigned ECN # and the description of the deviation on the ECN / Change description section.

4. Any and all costs associated with the deviation are the responsibility of the Supplier.

All forms and label formats can be obtained via a request from SupplierQuality@yappusa.com.

8.13 - Controlled Shipping

In the event of continued unacceptable Quality or delivery performance, the Supplier will be notified of the necessity to institute controlled shipping on the product. There are two levels of controlled shipping:

Level 1 (CS1) – The Supplier is expected to:

1. Identify the person responsible for the inspection activity.
2. Have an area separate and distinct from the manufacturing operations to conduct an additional inspection and certification of all products identified as suspect by YAPP USA Automotive Systems, Inc.
3. Specify the identification of certification to be used on the product and containers.
4. Report the type and quantity of defects found in the CS1 activity by the use of I charts, etc. as required.

Level 2 (CS2) – When YAPP USA Automotive Systems, Inc. experiences a reoccurrence of supply problems and action taken to date by the Supplier are insufficient to stop the flow of poor Quality, the Supplier will receive a written notification spelling out details of the containment, a confirmation reply form will accompany the letter and a meeting with Supplier and YAPP USA Automotive Systems, Inc. Plant, including Purchasing Director and Corporate Quality Manager to launch the following activities:

1. Identify the person responsible to the activity.
2. Retain an independent third party to monitor, measure, inspect and identify all product identified as suspect by YAPP USA Automotive Systems.
3. Have an area separate and distinct from the manufacturing operations to conduct the agreed upon containment activity.
4. Specify the identification of certification to be used on the product. Containers are to be labeled with a green tag that reads “CS2”. Each tag must be initialed and dated by the person identified on the confirmation reply.
5. Report the type and quantity of defects found in the CS2 activity.
6. Maintain CS1 activities in addition to CS2.
7. Exit criteria will be specified in the written notification.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

Failure to comply with CS2 activities can result in YAPP USA Automotive Systems, Inc. at our discretion, setting up CS2 at our facility and charging it back to the Supplier.

Supplier will be removed from controlled shipping when inspection data shows no defects found for a minimum of 30 days for the specified defect or concern. YAPP USA Automotive Systems, Inc.'s SQE will review the data and verify corrective action and a potential audit may occur.

9.0 – Tooling, Equipment and Gauges

9.1 – YAPP USA Automotive Systems, Inc. Tooling (Molds, Equipment, Gauges and/or Other Items)

Suppliers contracted to design and manufacture tooling, equipment and gauges that are funded by YAPP USA Automotive Systems, Inc. are required to provide a detailed drawing of proposed tooling, equipment and gauge designs to YAPP USA Automotive Systems, Inc. for approval and sign-off prior to commencing work.

Tooling and equipment designs shall adhere to the YAPPUSA Automotive Systems, Inc. applicable riders that are supplied with the purchase order. Final tooling, equipment and gauge detailed drawings must be supplied to YAPP USA Automotive Systems, Inc. in an electronic format such as IGES, Unigraphics, AutoCAD or other agreed upon format.

YAPP USA Automotive Systems, Inc. Supplier Quality may, at its discretion, require gauge correlation studies, boundary samples and detailed measurement process instructions to assure comparable measurement results.

Supplier gauges must be capable of meeting the Measurement System Analysis (MSA) guideline in accordance with AIAG standards and be certified by an accredited body.

9.2 - Identification of YAPP USA Automotive Systems, Inc.'s Owned Tooling

All YAPP USA Automotive Systems, Inc.'s tooling that resides at the Supplier's facility requires a signed Bailee clearly establishing ownership; the signed document shall be forwarded to YAPP USA Automotive Systems, Inc. Purchasing Department prior to release of final payment.

[YAPP USA Bailment Agreement](#)

The Supplier is responsible to protect and safeguard from damage all YAPP USA Automotive Systems, Inc.'s owned tooling, equipment and gauges. If the property is found to be lost, damaged or otherwise found to be unsuitable for use, the Supplier shall immediately report this to the YAPP USA Automotive Systems, Inc. Buyer.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

All tooling and equipment owned by YAPP USA Automotive Systems, Inc. and OEMs owned tooling shall be permanently marked so that the ownership of each item is visible and can readily be determined. The evidence of the identification shall be shared before the PPAP submission for all the projects. (Contact Purchasing YAPP USA Automotive Systems, Inc team to verify the standard)

The Supplier must have documented process and schedules for Preventive Maintenance. The maintenance schedule must include all YAPP USA Automotive Systems, Inc. Customers' owned equipment and tooling. Supplier is responsible for identifying and stocking critical spare parts.

10.0 – Materials Management

10.1 - Planning Schedules

Products may be ordered by issuance of a Spot Buy for a specific quantity or through a Blanket Purchase Order supported by Planning Schedules.

Suppliers who have been issued a YAPP USA Automotive Systems, Inc. Blanket Purchase Order will receive Weekly Planning Schedules.

Releases will be communicated through a variety of options including FAX, e-mail or Electronic Data Interchange (EDI). If the release is not received, it is the Supplier's responsibility to notify their designated YAPP USA Automotive Systems, Inc. Material Representative.

10.2 - Quantities and Timing

Deliveries are to be made both in quantities and times specified in YAPP USA Automotive Systems Inc. Planning Schedules or as authorized in writing by the designated YAPP USA Material Representative.

All dates specified on the release are arrival dates at our dock.

Suppliers who are unable to meet all requirements from YAPP USA Automotive Systems, Inc. for the specified delivery date, quantity and Quality MUST notify YAPP USA's Material representative immediately (no later than 24 hours prior to the designated delivery date). Note that this communication does not alleviate the Supplier of any of the related costs and penalties associated with being past due or shipping defective material. During such delays, YAPP USA may, at its option, buy the goods from other sources and reduce its schedules to Suppliers by such quantities without liability to YAPP USA Automotive Systems, Inc.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

Any excess costs resulting from unauthorized shipments, past due requirements and/or use of any unauthorized truck lines / shipping carriers (FedEx, UPS, etc.) will be debited in full from Supplier's account.

10.3 - Documentation

Products shall not be considered received until YAPP USA Automotive Systems, Inc. receives all required documentation. YAPP USA Automotive Systems, Inc. reserves the right to reject and return such products, at the Supplier's sole expense if documentation is not properly executed.

10.4 - Cumulative Material and Forecasting

YAPP USA Automotive Systems, Inc.'s maximum liability or exposure is limited to 7 weeks cumulative raw material, work-in-process and finished goods. YAPP USA is not responsible for any raw material, work-in-process and/or finished goods in excess of the times stated above unless prior approval has been negotiated. Quantities on the planning schedule beyond the cumulative dates above are for planning purposes only. In the event that additional lead-time is required, the Supplier must obtain prior written approval from YAPP USA Automotive Systems, Inc. Purchasing.

Forecast information will be supplied to Suppliers through rolling 12-week production releases. Forecast information is provided as an indication of the requirements of YAPP USA, but is not considered binding except as provided in paragraph above.

In order to support changes in production rates, replace failed or damaged product and emergency requirements, Supplier shall establish procedures and maintain adequate product to support YAPP USA's production requirements for 100% on-time delivery. As a minimum, such procedures shall be capable of supporting a 20% volume increase in production within 24 hours of notification.

10.5 - Packaging Requirements

Packaging will be designed to ensure that the integrity of the product is maintained throughout the supply chain.

Returnable containers are the preferred packaging method if total cost is justified. The containers are to be controlled and returned to the Supplier for reuse. "Returnable" pertains to Supplier owned or YAPP USA owned containers such as plastic or metal bins, racks, pallets, trays, separators and/or loose components.

Note: Cleanliness and maintenance are a requirement to ensure no part damage in transit.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

All returnable containers and internal dunnage must be pre-approved by YAPP USA. Packaging proposals by the Supplier must be submitted to YAPP USA Automotive Systems, Inc. Purchasing for approval and be signed-off by YAPP USA prior to implementation.

All products shipped to YAPP USA Automotive Systems, Inc.'s plants shall be clean and free from contamination. Any cleaning chemical, preservative or lubricant shall be reviewed and approved for use on YAPP USA's parts by YAPP USA Engineering. It is the Supplier's responsibility to remove all old labels from returnable containers.

[YAPP USA Supplier Packaging Guidelines](#)

10.6 - Notification of Shipments

An Advance Shipping Notification (ASN) must be sent to the YAPP USA Automotive Systems, Inc. materials representative within 59 minutes of shipment leaving the Supplier's facility. If Supplier fails to comply with the ASN and packing slip requirements, YAPP USA will apply the charges as described in the YAPP USA Supplier Shipping Instructions.

[YAPP USA Supplier Shipping Instructions](#)

In the event of a known shortage or late shipment, the Supplier shall immediately contact the YAPP USA Materials representative to notify them of the situation. The Supplier shall also indicate the anticipated time of delivery of expedited material.

Supplier shall immediately notify YAPP USA Automotive Systems, Inc. any circumstances that it anticipates may cause a delivery delay, Quality concern or otherwise impact the Supplier's performance of its contractual obligations. The notification should include information on the estimated period of delay, the reasons and what is being done to rectify the situation. If requested by YAPP USA Automotive Systems, Inc. the Supplier shall, at Supplier's risk and expense, use additional effort including premium freight such as airfreight or other expedited routing to avoid or minimize delay to the maximum extent possible.

10.7 - Identification Labels

It is YAPP USA Automotive Systems, Inc.'s requirement that all inbound shipments be labeled in accordance to AIAG's B10 label (detailed information on this label is available on the AIAG website).

All containers shall have a Production / Service Bar Code Label, affixed to the upper right hand corner of at least two adjacent sides. If the container is returnable, Supplier's shall ensure that old labels are removed and replaced with new ones.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

Note: Label must be legible, scannable and unobstructed from banding or other packaging materials.

All products received by YAPP USA Automotive Systems, Inc. must contain a serial number that is clearly identified on each label and every container. Suppliers must add date codes etc. within their allotted space. Mixed loads are not allowed via TL, LTL, FedEx or UPS. Each mixed pallet / box will be subject to penalization charge.

All Suppliers supplying materials to YAPP USA Automotive Systems, Inc. which are considered to be “controlled” under such regulations such as Workplace Hazardous Material Information Systems (W.H.M.I.S.), must be familiar with and comply with all such regulations, for packaging and shipping.

In addition, Supplier must follow all appropriate guidelines and rules relating to the country of receipt.

Material Safety Data Sheets (MSDS) must accompany all initial shipments and marked to the attention of YAPP USA’ Health and Safety Representative at YAPP USA Automotive Systems, Inc.

The Supplier must provide verification of the composition of the material used and their individual components as well as aspects relating to the environment. Supplier must input the IMDS data into the system prior to delivery of the first samples or PPAP package.

[YAPP USA Supplier Labeling Instructions](#)

10.8 – Inventory levels

Based on YAPP schedules, the Supplier is required to maintain an inventory level of at least 4 days when the lead time is under 4 weeks. If the Supplier's lead time exceeds 4 weeks, they are required to maintain an inventory level of at least 10 days.

11.0 – Logistics

11.1 - Transportation & Freight

Suppliers must use specified transportation methods as indicated on YAPP USA’s purchase order and/or accompanying routing letter, and/or as advised by YAPP USA Materials / Purchasing Group.

YAPP USA Automotive Systems, Inc. Materials / Purchasing Department must approve any permanent changes to carrier or delivery frequency in writing or via e-mail notification.

All regular freight, payable by YAPP USA (F.O.B. Seller or agreed Incoterms) must be shipped in accordance with YAPP USA purchase order. Non-compliance to these routing instructions will result in debiting back to the Supplier all applicable extra shipping

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

charges. Suppliers are expected to contact the approved carrier to set up pick-ups, unless otherwise advised.

Any Suppliers shipping goods F.O.B. YAPP USA or F.O.B. shipping point freight allowed are responsible for proper coordination of freight to meet YAPP USA required arrival dates.

11.2 - Expedited Freight

All expedited freight (ground or air) payable by YAPP USA Automotive Systems, Inc. must be authorized in writing or e-mailed by the YAPP USA Buyer. All invoices for expedited freight must be accompanied with the written authorization to ensure payment. All excess transportation charges, such as those resulting from use of unauthorized truck lines or shipping carriers (FedEx, UPS, etc.) which have been determined to be the Supplier's responsibility, will be debited in full from the Supplier's account.

11.3 - Quantities

Suppliers must ship parts in pack quantities equal to the material releases and may only ship on their assigned shipping date. Any deviation to this has to be pre-approved. All pick-ups for consolidated runs must adhere to shipping schedules without exception. Any delay in shipping to schedule must be communicated to YAPP USA immediately to avoid downtime issues. Excess freight incurred because of a missed or later pick-up will result in a charge-back to the Suppliers.

11.4 - Timeliness

It is critical to YAPP USA's Operation that shipments leave the Supplier's facility and arrive at YAPP USA on time. Failure to deliver shipments as scheduled may result in charges for YAPP USA production downtime. Suppliers must notify YAPP USA immediately if the selected carrier does not pick up goods as scheduled.

11.5 - Special Handling/Hazardous Material

YAPP USA Automotive Systems, Inc. must be notified prior to shipping any material that requires special handling or bracing or classified as hazardous material.

11.6 - Quality/Timeliness Issues

If past due or defective material is deemed the fault of the Supplier, the Supplier shall bear the cost of all excess freight charges required to meet YAPP USA's requirements.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

It is the Supplier's responsibility to automatically expedite should the Supplier foresee or incur a past due situation. The Supplier shall also be liable for all costs associated with downtime of YAPP USA and/or downtime costs billed to YAPP USA by its Customer (refer to clause 8.10 for charges).

11.7 - Documentation

The following requirements shall be met:

- A packing slip and bill of lading shall accompany all product received with a copy of the packing slip affixed visibly on shipment as described on the Supplier Labeling Instructions document.
- Except damage caused by a vehicle accident in transit, packing and packaging shall be sufficiently robust to protect products from shipping and handling damage, regardless of FOB point agreed.
- A correct bar-code label shall be attached to each package.
- Proper BOL must be used and completed correctly.

11.8 - Customs Documentation

All material shipping cross borders must have "Country of Origin" and "HS Tariff Classification" clearly marked on the commercial invoice along with a written description and value in currency of transaction.

Suppliers are responsible for accurate completion of customs documents and ensuring all documents are given to carrier at time of shipment for proper clearance through YAPP USA dedicated broker. Any delays in Customs and/or penalties for incomplete or inaccurate information will be the responsibility of the Supplier.

All charges resulting from the export and return of defective product shall be the responsibility of the Supplier.

All Suppliers are obligated to annually provide YAPP USA Automotive Systems, Inc. with all the appropriate Certificates of Origin (COO) to satisfy the United States-Canada-Mexico Agreement (USMCA) and origin requirements along with a Manufacturer's Affidavit. These are to be sent to Purchasing@yappusa.com by December 31 of the current year for the upcoming year. Failure to comply will affect your Supplier Quality Rating.

Offshore shippers must inform freight forwarder of all information needed to complete the Importer Security Filing form (ISF-10 obtained by contacting the freight forwarder being used) for US customs at time of shipment. Suppliers will be responsible for any costs or penalties relating to Suppliers failing to provide certification or providing fraudulent certification.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

11.9 - Customs Trade Partnership Against Terrorism (C-TPAT), Partners in Protection (PIP)

It is an expectation of YAPP USA Automotive Systems, Inc. that all Suppliers have or work towards achieving C-TPAT and/or PIP certification. As part of this requirement we ask that all Suppliers fill out the Supplier Facility Security Questionnaire. If sent by YAPP USA Automotive Systems, Inc., we require return within 14 days of receipt. All forms are to be returned to Purchasing@yappusa.com

11.10 - Materials Management Operations Guidelines (MMOG)

The “M-7: Global Materials Management Operations Guideline Logistics Evaluation (MMOG/LE)” guidelines were developed to reduce the time and work required by Suppliers and Customers to determine material process compliance. Using the guidelines, Suppliers complete a self- assessment and receive “A”, “B” or “C” ratings based on their compliance. While deficiency in one or more critical areas automatically earns a “C” rating, the MMOG/LE guide automatically develops an action plan to allow companies to address deficiencies and drive continuous improvement.

Suppliers shall complete the MMOG assessment if requested to do so by YAPP USA Automotive Systems, Inc.

Suppliers unfamiliar with MMOG shall contact YAPP USA Automotive Systems, Inc. for assistance.

12.0 – Additional Requirements

12.1 - Access

The Supplier shall allow YAPP USA Automotive Systems, Inc. and their Customers’ representatives all reasonable access to their premises to:

- Conduct audits as may be necessary to confirm that the Quality management system is performing as described in their manual.
- Confirm that product and subcontracted product or services conforms to specified requirements.
- Confirm the ability to sustain the declared production capacity.
- Verify the actions taken following a corrective action.

When circumstance allows, the YAPP USA Automotive Systems, Inc. Supplier Quality Engineer will notify the Supplier in advance of planned visits.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

12.2 - Capacity Improvements

As part of the Supplier's continuous improvement system, YAPP USA expects Suppliers to submit annually evidence of process capability improvements to the attention of the YAPP USA Supplier Quality Engineer.

12.3 - Confidentiality

The Supplier is required to maintain confidentiality of all drawings, specifications, documents or information provided by YAPP USA in any form or means. All YAPP USA provided documentation is to be maintained in a secure environment.

12.4 - Cost Reduction

Suppliers to YAPP USA Automotive Systems are expected to achieve a 3% minimum cost reduction annually and will be rated on their participation in this program. Cost reduction plans shall be submitted to the YAPP USA Buyer at the RFQ stage. The Supplier will be credited with those cost reduction when plans are approved and implemented.

12.5 - Customer Directed Parts

All requirements stated in this manual apply equally to Suppliers of Customer directed parts.

12.6 - Labor Disputes

The Supplier will notify YAPP USA in writing at least six (6) months in advance of the expiration of any current labor contract(s). If requested by YAPP USA Automotive Systems, Inc., the Supplier will have available eight (8) weeks' supply of finished goods at least 30 days prior to the expiration of any such labor contract, in quantities and for storage at any place or places designated by YAPP USA at the Supplier's expense.

The Supplier will also notify YAPP USA immediately of any actual or potential labor disputes or disruptions that will delay or threaten to delay timely delivery.

12.7 - Transparency

Full transparency and accuracy is expected to be practiced by all Suppliers and their representatives when providing YAPP USA Automotive Systems, Inc. with information; information could be in the form of documents, sample parts, Quality data, tooling data, processing data, run at rates and audit results.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

12.8 - Supplier's Competitiveness

Suppliers agree to support YAPP USA Automotive Systems, Inc. in any joint effort with respect to cost reductions required by YAPP USA's Customer. Should the Supplier be unable to support YAPP USA's requirement, YAPP USA reserves the right to competitively bid the products and or services to confirm market price and to award an agreement for those goods and services to the successful bidder. Any Supplier notice of any market movement price increase shall be provided 180 days prior to any increase to be implemented.

12.9 - Warranty

Suppliers are responsible to become familiar with the end Customers warranty policies, as these will be cascaded down the supply chain.

When YAPP USA receives a warranty claim that involves supplied product, it becomes the responsibility of that Supplier to open a corrective action to document the investigation of the cause, testing results, root cause identification, and corrective action taken.

The Supplier shall be responsible for all costs associated with warranty claims determined to be attributable to the Supplier's product, process, or nonconformance, including, but not limited to, OEM chargebacks, sorting and containment costs, testing and analysis expenses, and YAPP USA administrative and related costs incurred in investigating, managing, and resolving the warranty claim.

12.10 - Traceability

Supplier must ensure identification and traceability of products supplied. The identification shall include, at a minimum, labeling of packaged products, manufacturing location, manufacturing date including barcode (Following the standard (YYYY/MM/DD) , manufacturing shift, part identification and sub- contractor traceability (i.e. heat treat, plating, lot details and traceability).

Suppliers shall maintain traceability that enables a direct correlation between each raw material batch/lot and the corresponding finished product. Traceability records shall be maintained and made available to YAPP USA upon request.

For the critical components listed below, and when required by YAPP USA, the supplier shall affix a 2D barcode to each individual purchased component. The barcode shall be permanently attached to the component and positioned so that it does not interfere with the component's function, assembly process, or performance in the finished product.

- FDMs
- Wire-Harnesses
- Electronics

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

- Fuel lines
- Hoses
- Fuel Valves

Bar code content, format and label requirements for part identification, verification and traceability, Key Characteristics Designation System (KCDS), SHALL be encoded in a Data Matrix or optionally Quick Response (QR) Code two-dimensional (2D) symbol (bar code). Included in the information on the 2D bar coded label, but not restricted to, must be YAPP USA Automotive Systems, Inc. internal part number, manufacturing / assembly year, Julian date, Supplier unique serial number. The 2D label must be approved for use by YAPP USA Automotive Systems, Inc. prior to use.

12.11 - Training

Supplier employees must be competent and qualified for their job function. The Supplier must ensure this through appropriate internal and external training courses. A training record must be available for all employees producing a product or service for YAPP USA Automotive Systems, Inc.

12.12 - Contingency Plan

The Supplier must submit a recovery/contingency plan for any Quality, delivery, loss or spill that could affect production flow of material into YAPP USA Automotive Systems Inc. Assembly Plant.

12.13 - Conflict Minerals Compliance

All YAPP USA Automotive Systems Inc.'s Suppliers shall report their potential Conflict Materials as per YAPP USA Automotive Systems, Inc. specific requirements and our OEM Customer Specific Requirement Guidelines on a yearly basis. Suppliers are to refer to AIAG for more information and details (www.aiag.org).

12.14 - Record Retention

Suppliers are expected to maintain applicable record retention periods as specified in IATF 16949:2016 latest edition standard or as defined by end Customer or as defined by your procuring division or as defined to longer retention periods in compliance to all applicable legal or governmental requirements. The length of retention is defined by the longest applicable requirement.

SUPPLIER QUALITY AND DEVELOPMENT MANUAL

13.0 – General and Conclusion

This Manual's objective is to clearly state YAPP USA Automotive Systems, Inc.'s expectations that will support our operation and provide the level of acceptable Quality and cost parameters that our Customers require of us on a year over year basis. With committed Suppliers, we can meet and exceed these targets. We welcome feedback from the Supplier base for ideas that will create continuous improvements. If there are areas where you see we could be doing better please be open with your communications. It is only by truly working together can we achieve more.

YAPP USA Automotive Systems, Inc. is known as an innovator and leader within its business. This has provided continued growth and prosperity for us and our Supplier base. We are committed to continue this tradition by working with dedicated and committed Suppliers.

Thank you in advance for supporting this very important Supplier Quality Manual.

Sincerely,

Rodolfo Gonzalez
Director of Quality
